Griffin Park Toilets

In April 2019 Porthcawl Town Council agreed to proceed with a new build toilet facility at Griffin Park. The Town Council has continued to progress this intention with vigour to ensure that the new building facilities will be complete in Spring 2020. As part of this a planning application was recently submitted.

We are aware that a number of security features have been listed in the Design and Access Statement as part of the planning application. Unfortunately, the Town Council's enthusiasm and intentions have been misinterpreted.

The Town Council are committed to providing new toilets that will be good quality and of traditional construction. The various features listed in the design statement will not be included in the construction. The Town Council wish to provide a traditional facility, which is clean, accessible, regularly maintained and that complies with planning and public health requirements. It will be a facility that the town will be proud of.

There will be clearly marked separate toilets for male and female and a unisex disabled toilet. The facility will be supported by an ongoing cleaning contract.

The Town Council accepts that there has been an error made in the Design and Access Statement. The Town Council has never had any intention of installing any floor or other movement sensors, any restricted time entry, there will not be water sprays, or self-opening doors, no weight sensitive floor and no dousing equipment as described in the statement.

Appropriate amendments will be made to the Design and Access Statement as necessary.
